## PROFILE

---

Technical Programme Manager with nine years delivering complex, high-value programmes across healthcare technology, autonomous robotics, medical devices and enterprise systems. Repeatedly brought into scaling organisations to build delivery capability from scratch and own programmes end-to-end. Specialises in turning ambiguous, high-risk problems into structured delivery plans in regulated and safety-critical environments. Strong track record in cross-functional leadership, risk management, governance and stakeholder alignment at executive level. Delivered £5.5M+ in programmes across 25+ client engagements. PMP and PSM I certified, with a STEM background in engineering.

## CORE COMPETENCIES

---

- Technical Programme Management • Project Management • Portfolio Management
- PMO Build & Governance • RAID & Risk Management • Change Control
- Dependency Management • Stakeholder Management • Steering Committee Reporting
- Agile, Scrum, Kanban & Hybrid • Budget & Financial Tracking • Resource Management
- Vendor & SLA Governance • Line Management • Commercial Proposals

## PROFESSIONAL EXPERIENCE

---

### i3 Simulations | Technical Programme Manager | VR & AI Health Technology Sep 2022 - Present

*Health tech company building AI-enabled VR clinical simulation products for safety-critical medical training.*

- Built and scaled a fully governed programme function from the ground up, introducing Project Initiation Documents (PIDs), RAID, change control and financial tracking across a portfolio of four concurrent client programmes.
- Owned multiple concurrent client programmes end-to-end without dedicated project support, aligning commercial, clinical and engineering teams from initial scoping through to live deployment.
- Led delivery of a £1.5M immersive clinical simulation platform, achieving 90% on-time delivery and a 95% programme success rate across cross-functional workstreams.
- Reduced scope creep by 60% through formal change control protocols in a safety-critical clinical environment.
- Scaled global platform rollout to 100+ clinical sites across 25 countries, driving end-user adoption up 50% through iterative releases aligned to real clinical workflows.
- Line managed cross-functional teams across engineering, clinical, QA, 3D/creative and commercial functions, maintaining formal performance accountability alongside day-to-day delivery leadership.
- Developed real-time programme dashboards in Power BI and Tableau covering financials, risks and resource allocation, improving forecasting accuracy by 40%.
- Drove 30% revenue growth through commercial scoping, proposal development and B2B partner engagement.

### Ross Robotics | Project Manager | Autonomous Robotics Mar 2022 - Aug 2022

*Autonomous robotic systems for high-voltage infrastructure inspection in safety-critical environments.*

- Owned end-to-end delivery of a £2M autonomous robotics programme across mechanical, electrical and software engineering teams, establishing delivery structure with no prior documentation or handover.
- Reduced delivery timelines by 20% by replacing over-engineered frameworks with lean, high-clarity processes suited to a six-person engineering team.
- Eliminated single-supplier dependencies across all hardware components, reducing procurement costs by 20% and improving supply chain resilience.

- Built the foundational documentation framework for ISO 9001 and ISO 27001 certification, with both certifications achieved post-handover.

**LEX Diagnostics | Project Coordinator | Medical Devices** **Sep 2021 - Mar 2022**

*Ultra-fast PCR-based point-of-care diagnostic systems under strict regulatory and scientific constraints.*

- Bridged the gap between scientific R&D and engineering teams, keeping technical milestones aligned with regulatory requirements and project timelines throughout the development cycle.
- Reduced regulatory compliance risk by 40% by implementing structured documentation frameworks aligned to medical device standards.
- Standardised planning, scheduling and approval workflows across R&D and engineering teams, improving delivery efficiency by 20% and accelerating development timelines by 15%.

**Tata Consultancy Services (TCS) | Associate Project Manager | IT Services** **Aug 2016 - Sep 2020**

*Global IT firm delivering enterprise ERP, cloud migration and automation programmes for multinational clients.*

- Delivered a £2M SAP ERP cloud deployment, coordinating distributed teams of 15+ across multiple geographies and senior client stakeholders.
- Built a custom billing and financial forecasting tool in SAP BI/BW, reducing billing and tax discrepancies by 40%; recognised with the Thomson Reuters Best Performer Award for innovation.
- Drove a 30% increase in team productivity by leading the transition to Agile and Scrum across distributed teams, introducing sprint planning, backlog refinement and velocity tracking.
- Reduced operational costs by 20% through cloud migration and cut incident response times by 30% via automated error-resolution workflows.
- Reduced ERP production incidents by 50% through structured root cause analysis, risk mitigation planning and change management processes.
- Built a forecast budget planning tool that improved cost predictability by 70% for business unit heads.

**SKILLS & TOOLS**

**Methods:** Agile, Scrum, Kanban, Waterfall, hybrid delivery, Lean Six Sigma, full lifecycle programme management

**Domains:** Healthcare technology, medical devices, autonomous robotics, engineering systems, enterprise technology, digital products, regulated and safety-critical environments

**Tools:** Jira, Confluence, MS Project, Power BI, Tableau, SAP BI/BW, SQL, AWS Cloud, Figma, Claude Code

**EDUCATION**

**MSc Engineering Project Management** University of Manchester, UK **2020 - 2021**

**BTech Mechanical Engineering** Jawaharlal Nehru Technological University, India **2012 - 2016**

**CERTIFICATIONS**

**Project Management Professional (PMP®)** Project Management Institute **2022**

**Professional Scrum Master I (PSM I)** Scrum.org **2022**

**AWS Certified Cloud Practitioner** Amazon Web Services **2024**

**Lean Six Sigma Black Belt** Six Sigma Academy **2024**

**IBM AI Product Management** IBM **2025**
